Visit Mid-States at the AIA Iowa Convention

The AIA Iowa Fall Convention is slated for Thursday, September 29 and Friday, September 30 at the Community Choice Credit Union Convention Center in Des Moines, Iowa. Please stop by Booth 57 and say hello to Troy Yaun, Preconstruction, and Tara Loomis, Senior Structural Engineer! They'll be giving away some water bottles, tote bags, level pens... and some serious precast knowledge.

The theme of this year's convention is Advocate! AIA Iowa shared: "As surely as our work is a fundamental part of the world around us, it has the potential to address the many challenges the world faces. Some of these challenges are brand new, while some are generations old

and only just now receive the attention they necessitate. This year, we would like to focus on advocacy during our convention, to take on these challenges."

Design teams are such an important part of the success of any project. It is a privilege to partner with some of the best around. We look forward to seeing you there and learning about your latest projects.

Precast Chalk Talk: Episode 36

In this episode of Precast Chalk Talk, President Hagen Harker visits a job site were we are swinging in wall panels in Beloit. Learn more about the process in Part 1 of this series.
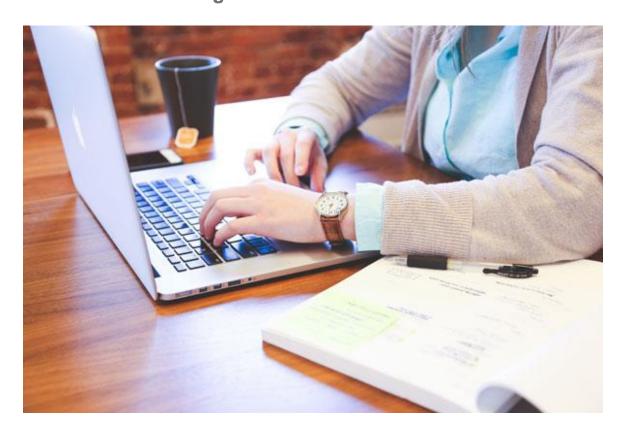

And stay tuned for Part 2, where we'll discuss some of the finishing techniques used to

ensure our products stand the test of time and the elements.

Earn Continuing Education Credits Online With PCI

Are you looking to earn continuing education credits from the comfort of your home office?

PCI (Precast/Prestressed Concrete Institute) is a registered provider of continuing education for architects and engineers to stay current and fulfill licensure requirements in all 50 states. The organization is dedicated to increasing the use of

precast, prestressed concrete products in the transportation and commercial markets.

PCI offers quality online education on precast and prestressed concrete topics and has compiled a wide array of courses to broaden your understanding of precast concrete and prestressed concrete systems. Topics range from design aspects of precast concrete to quality control, to architectural precast concrete and more.

Learn more about how precast builds by selecting courses from the PCI eLearning Center. Check back often for more courses.

Check it out >>

Additionally, both PCI and its regional Chapters regularly offer one-hour long webinars on a variety of topics from design and construction to sustainability and more. Continuing Education Credits are offered to those who participate in the live webinar only, though webinars remain available for viewing on the website.

About Mid-States Concrete Industries

Since 1946, we have produced structural and architectural precast concrete systems that provide our partners with high quality building materials with sustaining performance.

The biggest part of our story is you - our clients. For more than 75 years, you have trusted us to help with your projects. Each project offers its own unique goals and opportunities. We partner with you to find the right solutions for your project.

Over the years, Mid-States has helped ensure your projects come in on-time, on-budget and on-target through project assessment and planning, project strategy, single source installation, and completion confirmation. With dedicated sales, estimated, project management, engineering, design, production and construction teams, Mid-States will continue to meet your precast needs.
