

Experts in Precast Concrete Solutions for Educational Institutions

Your educational institution project is important. It's more than just a building or addition. It's the auditorium where children discover their love of theatre, the gymnasium where children learn to shoot three-pointers, and the science lab where the future scientist who discovers the cure for a rare disease finds their passion.

That's what makes Mid-States Concrete's extensive experience in concrete solutions so vital to your project. From auditoriums to natatoriums, gymnasiums to safe rooms, classrooms to computer labs, and everything in between, Mid-States has completed hundreds of [educational institution projects](#). That means you get the exceptional experience you need most when the stakes are this high.

[Like you, this is who we think about when we undertake an educational institution project >>](#)

When it comes to educational institution projects, trust is important. Your completed building is a place where children will learn, grow, and play for years to come. We know that and we don't take it lightly.

At the beginning and throughout the [build process](#), our team will ask questions and listen to your objectives and goals. Then, we'll apply the latest precast concrete products and

techniques to your project, adhering to the strictest safety standards in the industry.

We turn innovative concepts into structural reality. Precast concrete is known for its inherent sustainability and energy efficiency benefits, making it perfect for school settings. Mid-States has the unique ability to get even more out of precast concrete with our innovative building solutions.

- Achieving large open spans through our total precast system of beams, columns, hollow core, and wall panels;
- Matching the decades-old brick of an existing structure;
- Attaining the look of your dreams with unique and personalized form liners and graphic concrete technology;
- And more!

When to Choose Precast Over Tilt-Wall

Concrete is a smart choice for exterior wall construction given its strength, durability, and resilience. And when it comes to using concrete, there are generally two choices: precast or cast-in-place.

As every project is unique, it is crucial to consider design options, job site space, speed of production, speed of installation, carbon footprint and performance to determine which option is most beneficial to your project.

How do you know which you should use for your project?

- When quality is important, choose precast.

- When schedule is important, choose precast.
- When space is important, choose precast.
- When aesthetics are important, choose precast.
- When panel thickness and carbon footprint are important, choose precast.
- When long-term costs are important, choose precast.

Mid-States Concrete Industries is a proud member of [AltusGroup](#), an international collaboration of precast concrete companies dedicated to speeding and perfecting the development of precast technologies that improve the built environment. AltusGroup members work together to bring advanced technology to market, then compete against one another for work.

At Mid-States Concrete Industries, your project is a big deal. That's why our team ensures that each project not only begins successfully but is completed successfully as well. As a Precast/Prestressed Concrete Institute [Certified Plant and Erector](#), our precast concrete components are manufactured and installed according to stringent industry standards.

Have questions regarding [precast wall panels](#) or precast concrete in general? Our team is happy to help! Contact our [sales team](#) at sales@msprecast.com.

About Mid-States Concrete Industries

Since 1946, we have produced structural and architectural precast concrete systems that provide our partners with high quality building materials with sustaining performance. Mid-States Concrete Industries recently acquired International Concrete Products in Germantown, Wisc. The acquisition has provided the opportunity for expanded high-end architectural capabilities.

If you'd like to learn more about how precast concrete can benefit your projects, please contact our team today at sales@msprecast.com.
